HEADTEACHER'S WELCOME

MR R PATEL

Welcome to our Spring term newsletter! This term always has a fresh feel to it, as we welcome a new calendar year and watch with hope as the days become lighter.

Our time is currently filled with reflection and gratitude as we embrace the holy month of Ramadhan. This gratitude has recently been demonstrated by our pupils and staff, when they baked fresh goods to include in the Iftar packs that we delivered to widows and orphans in our community. In addition, our spirituality team have created a wonderful programme of brunch activities for our pupils to take part in throughout this blessed month, including listening to the story of Musa AS, creative Quran journaling, and quiet time for reflection and prayer.

Preparation for Ramadhan was also woven into the daily activities that took place during British Science Week. This is always one of the most exciting weeks of the school year, and this year's theme of 'time' was interpreted in a way that would lend itself to preparing for a productive Ramadhan. Our pupils took part in a wide variety of activities such as making ice cream with our local Grannies, making rockets and water clocks, taking part in demonstrations with a group of children from Deepdale Primary School, and even having the opportunity to learn about the life of bees and the vital part that they play in our world. British Science Week was a huge success, and we hope that your daughter has shared her own stories of the week with you.

Celebration Assembly

Page 18-22

Our pupils have also enjoyed taking part in a range of engaging activities for our World Book Day celebrations. We were grateful to have been joined by author, Nathan Parker, who gave an insight into his journey into writing through an assembly that he delivered, as well as presenting a series of narrative writing workshops to help our pupils to develop greater creativity in their writing. Our girls also had the opportunity to take part in the 'PMGHS Masked Reader' competition and have their photo taken in our World Book Day themed photo booth. We are certain that there was something for everyone!

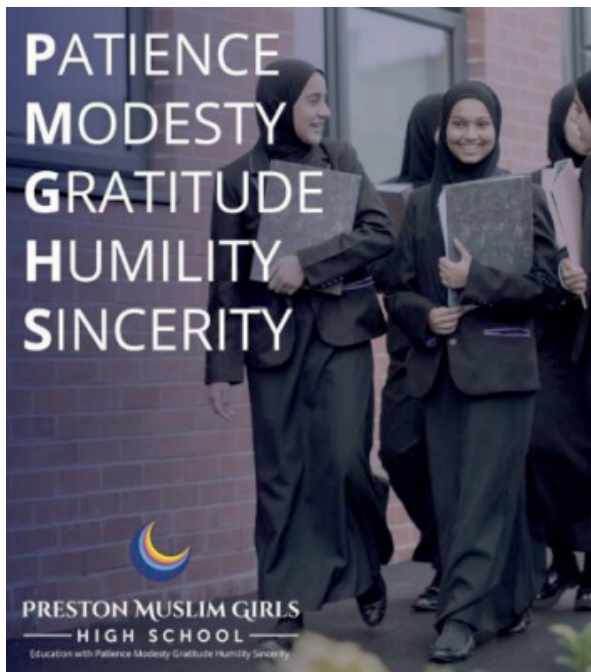

Finally, the Spring term is when we launch our annual Head Girl Campaign. This is a thoroughly exciting time in school, with our candidates campaigning for votes, and every pupil learning first-hand about the power of democracy. Following a closely-fought campaign, our new Head Girl and Deputy Head Girl were announced, along with our new, dedicated prefect team – you can read through all of the details later in the newsletter.

I hope that you enjoy learning more about the many events and activities that have been taking place in school this term.

Please continue to remember the school and the entire Ummah in your duas.

Mr R Patel
Headteacher

MEET THE PUPIL

SAFFANAH SHOWKAT
YEAR 10

Tell me about yourself.

Salaam, I am Saffanah Showkat, an advocate for equal rights and opportunity for all. I often express my ideas on equality, philosophy, and politics through my poetry and literature. Whilst I adore literature and politics, I am also a public speaker and an athlete in taekwondo. Being a girl in a sport that is more known for the men was and still is difficult. Being constantly told that I will never be good at sport because I am female is degrading, but thankfully, my mother raised me to speak out. I now deliver speeches and spread the message of equality. I also aim to show my fellow pupils that nothing is impossible, and I work towards growth as a student council member and representative.

Why did you choose to attend PMGHS?

PMGHS is a school of opportunity and growth. You get to learn your basic subjects, but also learn about what Islam says about the world, and that is truly amazing. It is also a well-known school, even out of the North-West of England, and I feel many students overlook how lucky they are to attend this particular school.

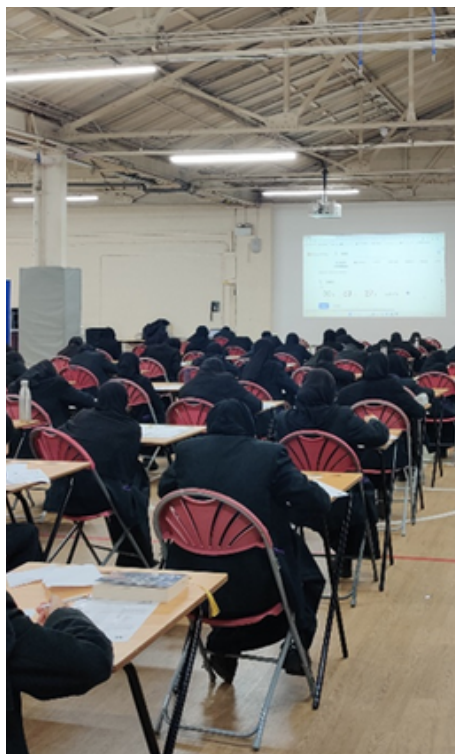

What is your favourite subject and why?

Looking at all the subjects, it is truly hard to pick just one subject. Biology reveals Allah's beauty about creatures, physics teaches me how the world works, chemistry teaches me about things I cannot see, English lets me explore my creativity, and maths lets me solve questions that interest my mind. However, I have recently been extremely interested in History. Looking at how people ruled over countries and how it still affects us today is marvellous to me, and so as of now, History is my favourite subject.

What would you like to do when you leave education?

Whilst I am not completely sure about what career I would like to go into, I do know one thing for certain - I would love to keep competing in taekwondo as an athlete and, hopefully, get to a professional level along with my main career. I want to keep inspiring those that were told they can't, because they can.

UKMT MATHS CHALLENGE

YEAR 9 & 10

Years 9 and 10 Triumph in the annual UK Maths Trust Challenge!

A hearty congratulations to our outstanding Year 9 and 10 pupils who recently distinguished themselves in the UK Maths Trust Challenge. Their dedication, resilience and intellectual prowess were on full display, culminating in a remarkable achievement – a commendable collection of gold, silver and bronze certificates. We extend our sincerest praise to those who secured the highest honours on the podium. Their exceptional performance serves as an exemplary model for their peers, demonstrating the rewards of sustained commitment and focused effort. Our applause extends beyond the certificate recipients to all who participated: we offer you our deepest appreciation. Your courage to embrace challenge played an invaluable role in this success.

This accomplishment stands as a testament to the collaborative efforts of both our pupils and their dedicated teachers. It reaffirms our unwavering belief in the potential of each individual to excel. We encourage all our pupils to continue fostering their intellectual curiosity, embracing challenges, and striving for excellence in all their endeavours. We celebrate this achievement with immense pride and anticipate further triumphs in the future.

OUR WINNERS ARE:

Year 9

Humayrah Amiji Bronze Award
Zaynab Hussain Bronze Award
Aamena Ikheria Bronze Award
Aishah Mamoon Bronze Award
Umamah Rawat Bronze Award
Aamina Saiyed Bronze Award
Areesha Sajjad Bronze Award
Fatema Vahaluwala Bronze Award
Eliza Adeel-Abrar Silver Award

Year 10

Khadija Amiji Bronze Award
Noor Elhakim Bronze Award
Deena Ismail Bronze Award
Humayrah Malik Bronze Award
Humaira Master Bronze Award
Aisha Patel Bronze Award
Maariyah Isap Silver Award
Zainab Piperdi Silver Award
Saffanah Showkat Silver Award
Yumna Umar Gold Award

BRITISH SCIENCE WEEK

2024

In a whirlwind of scientific exploration, our school celebrated British Science Week with enthusiasm. Year 9 students wore their virtual reality headsets, embarking on an immersive cosmic journey through space, while Year 8s engaged in a buzz-worthy workshop with the "Bee Centre," delving into the world of honeybees and honey production. They even got to taste some honey! Year 7s took science to new heights as they designed and launched rockets in a friendly competition to see whose could soar the highest.

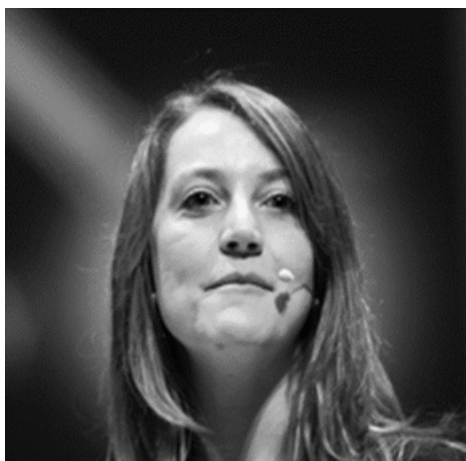

The heart of the week beat with captivating demonstrations for Key Stage 3 students. From dancing blue flames to explosive cannons, science teachers brought the subject to life with a range of amazing experiments, leaving students in awe. The excitement extended beyond our own school as Deepdale Community Primary School, and the elderly joined in for a thrilling science show presented by our dedicated science staff. British Science Week proved to be a dynamic celebration, sparking curiosity, and fostering a passion for the wonders of science.

GCSE SCIENCE LIVE

THURSDAY 25TH JANUARY

We arrived at the Manchester Opera House with glee and a buzz of excitement. Students didn't know what to expect from this trip, yet when we entered the hall, it was extravagant and stunning, with emerald seats and curtains. We all took our seats with our friends and awaited the first scientist's arrival. The host gave an introduction of what to expect and how we can pursue our passions of science and see where our curiosity leads. There were many scientists who arrived and shared stories of their lives and career paths. Many of us love science, and from this trip we were able to see that there are many opportunities awaiting us. Science is broad and intertwines with a range of other subjects. My favourite topic of the day was Neurology, as we were able to discover where our 'gut-feelings' come from and how meditation reduces our stress. It was fascinating to see how our brain controls our every movement. The creation of Allah SWT is truly captivating and inspired questions to arise in the minds of passionate and thrilled students. We even got to stand up, use our imagination and contribute to fascinating experiments which caught our eyes and sparked thought.

Another scientist discussed nanotechnology, and how it contributes to our daily lives and the development of our society. Suddenly, many career paths were revealed for us. I was definitely inspired to pursue a career in science and study the materials of our world which are invisible to the naked eye. We were given the ability to see, study and sew ideas for our future. Dr Kate Lancaster spoke about nuclear fusion and crafting a star. We were also given insight on our exams and how we should study to ensure success. Our exams are our priority, and the powerful words of these scientists will drive us to study diligently and with effort. All the scientists had a unique flair in their choice of specialism, from fertility, atoms, and the world of physics – it is safe to say that the future is now in our hands.

The esteemed Professor, Lord Robert Winston, made an enlightening presentation, captivating the audience with facts on fertility and his life's work.

We are grateful to the science department and PMGHS for granting us the opportunity to listen to these respected scientists and to ask the questions buzzing in our minds. This trip was an enriching experience to be remembered throughout our educational journey.

-Mishel Rafiq (Year 10)

WORLD BOOK DAY 2024

THURSDAY 7TH MARCH

At PMGHS our World Book Day activities went on for a whole week! On Monday 4th March, Nathan Parker, two-time shortlisted author of the Lancashire Book of the Year and acclaimed writer of the novel 'The Disappearance of Timothy Dawson', visited school and delivered a fascinating assembly to the Year 9s. He shared insights into his writing journey and his personal path to becoming an author. Then Nathan led a series of narrative writing workshops, guiding Year 9 pupils to write a story based on his story structure. It was fantastic to be able to meet and work with a real author.

On Tuesday 5th March, an exciting 'Masked Reader' competition took place, challenging students to guess which staff members were reading excerpts from their beloved books. With distorted voices, the pupils eagerly listened and attempted to identify the readers. Well done to the winners listed below!

Aaminah Arif Patel-7H

Rumana Khurdam-8G

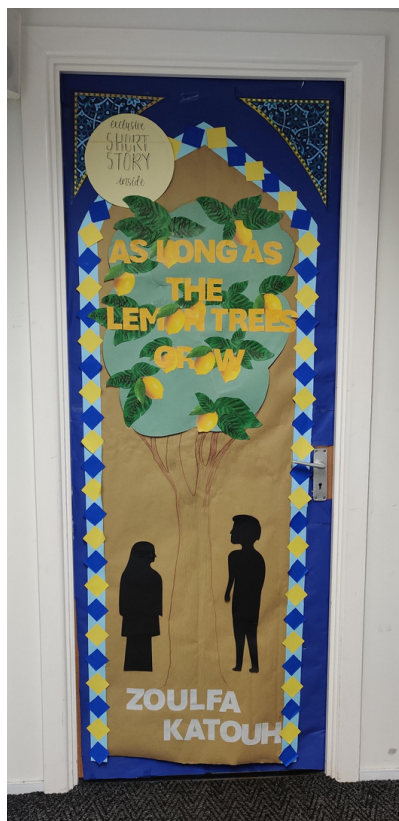

Rida Ali-9P

Alishah Gul-10M

On World Book Day itself, there was a range of activities planned for pupils to enjoy reading. In English lessons, pupils participated in carousel activities, allowing them to immerse themselves in the differing genres of murder mystery, horror, sci-fi and fantasy. At lunchtime, pupils were able to take a photo with their favourite book or with a reading prop of their choice at the photo booth. This was great fun! Reading badges, created by Anisah Vorajee in Year 11, were sold at lunchtime and all proceeds will be going to charity. There was also a book trail around the Dr Khan building, where 12 book covers were on display with the titles and author names hidden and pupils had to guess what they were. Pupils were also given World Book Day tokens, which they could use during the Scholastic Book Fair, Wednesday 20th March to Tuesday 26th March.

Lastly, there is an inter-form competition that is currently taking place with each form group (Year 7-10) choosing a book as inspiration to decorate their form door.

PREFECTS ELECTION 2024

Pupils had been eagerly waiting for the Prefect Elections process to start, where the pupils had to go through a vigorous and competitive application process to become Prefects.

The votes have been counted and verified. Pupils at PMGHS have chosen their Head Girls! What a proud moment for the school to announce the new 2024 Head and Deputy Head Girls:

Head Girl – Mishel Rafiq

Deputy Head Girls – Saffanah Showkat & Zaina Bhayat

Congratulations to them all and well done to all of those who applied!

ESU DEBATE MACE

ROUND 2!

We are thrilled to share the exhilarating journey some of our Year 10 students embarked upon as part of the ESU Debate Mace. The ESU Debate Mace is the oldest and largest debating competition for schools, providing a platform for our pupils to develop their critical thinking and debating skills.

Under the guidance of Miss Ugradar, our students have been diligently preparing for this debate. Through weekly lunchtime sessions, filled with spirited discussions and rigorous practice, they have demonstrated dedication and enthusiasm.

In the latest round of the competition, our debaters faced opponents from Lancaster Royal Grammar School. The motion, 'This House Believes that schools should focus on maximizing students' value to the modern workplace over a broad and balanced education,' created intense discussions and impassioned arguments.

With eloquence and conviction, our students took on the role of the opposition, articulating convincing reasons why a broad and balanced education should remain the basis of our educational system. They tackled difficult aspects of the topic, using lots of academic research and personal experiences to strengthen their arguments.

The atmosphere was electric as each speaker presented their case, engaging in a battle of persuasion. Despite the stiff competition, our students showcased remarkable poise and resilience, leaving a lasting impression on both the judges and spectators alike.

We extend our heartfelt gratitude to all the parents and guardians for your support and encouragement throughout this exhilarating journey.

PRESTON SCHOOLS INDOOR ATHLETICS COMPETITION

YEAR 7 & 8

A number of pupils from Year 7 and 8 were selected to represent the school at the Preston Schools Indoor Athletic Competition held at Preston College in January. The girls performed extremely well in the different track and field events. A special mention to Emaan Shahid 7P and Hamna Umar 7H, coming 1st and 2nd in the Standing Long Jump and Retaj Kodi 7M, 1st in The Shot Put. A big Well Done to all the girls who took part!

CAREERS TALKS PR SHE

We invited local professionals into school to talk to the Year 8, 9 and 10 about their unique career journey as part of the Careers based PSHE lesson. This was a valuable opportunity for the pupils to hear firsthand what different careers are like. Pupils had the opportunity to listen to professionals that included police officers/detectives, an interior designer and professionals from the NHS. The guest speakers talked about what qualifications they studied and what inspired them to choose their career path. Pupils also had the opportunity for a Q&A session. The goal of career talks is to equip pupils with information to inspire them and help them to make better informed decisions about their future career paths.

ISLAMIC ART PROJECT

TRIP TO ROCCIA

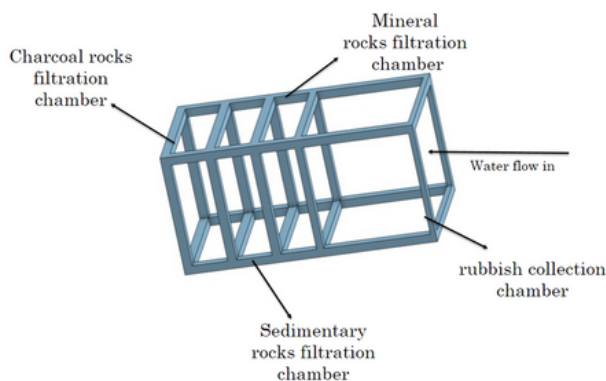

As part of our GCSE Art portfolio, we are currently exploring colour and pattern within Islamic Art. To research this in greater depth, we took a trip to the local tile showroom, Roccia, where they have a wide range of tiles in all different colours, patterns and textures. We were able to take a variety of photographs from around the store to use for inspiration in our own work. The Roccia staff were extremely accommodating in showing us around and answering any queries that we had. We are extremely appreciative of the welcoming nature of our local businesses and hope to continue using the knowledge and inspiration gathered from this trip within our own artwork.

-Maarya Wadie & Aaminah Bapu (Year 10)

DT COMPETITION

YEAR 9

This product is designed to clean and purify flowing waterways such as canals and rivers. Through our research, we have found that many canals are polluted. Our aim is to remove the rubbish.

Our first design idea was made up by thinking of ways to remove the rubbish while the canal runs its usual cycle. We considered making a box which collects rubbish that would need to be removed by a handle (this may have to be filtered every day or week). We also thought about oils and other smaller waste pollution, so we decided to include natural water filters, such as mineral rocks, sedimentary rocks and charcoal. We then thought of adding more boxes containing the filtering rocks.

Our design has four compartments, each one dedicated to cleansing and purifying the water. In the first compartment litter will be collected as water runs through, it will then flow through stone, sand and charcoal, trapping and removing impurities from the water. Water purification systems are widely known for the ability to lower the risk of dangerous diseases such as gastrointestinal disease, by 80%.

SEN NEWMAN TRIP

YEAR 11

**CARDINAL
NEWMAN
COLLEGE**

During the Spring term, the SEND department took a group of Year 11 to Newman College as part of the school's careers programme. It was an informative day where the students were given an insight into the different subjects offered at the college, including A Levels, T Levels and BTECs. This event was the perfect way for students to make an informed choice about which pathway is right for them. They toured the College and looked at the different facilities it has to offer, including the sports facilities, cafeteria, study and social spaces. They had the opportunity to talk with a variety of subject teachers, who were able to inform and advise on their different subject choices. The girls also had an opportunity to speak to the college SENCO to find out about the additional support available for students with additional needs. It was a valuable day for the girls, in a relaxed and friendly environment.

UCLAN NURSING

CAREERS - YEAR 7

Many of our pupils are interested in a career in nursing. We invited local nursing professionals into school to talk to the Year 7 about their own unique career journeys as part of the Careers PSHE lesson. This was a valuable opportunity for our Year 7 to hear firsthand, what a career in nursing would involve. The guest speakers talked about the qualifications they studied, and what inspired them.

Pupils also had the opportunity for a Q&A session.

Year 10 had the opportunity to visit Leyland Trucks as part of the school careers' programme. Leyland Trucks operates as one of Europe's most advanced truck assembly facilities, The Leyland Assembly Plant. The company's future development is focused on the use of the latest technologies and the application of information technology in all aspects of truck design, manufacture, procurement and logistics.

During this visit, pupils were given a tour of the assembly facilities and had the opportunity to learn about the apprenticeship schemes they have to offer, and the many job roles available within the company.

The trip to Leyland trucks inspired us to join the world of design, to build for the world and help support society in their safe travels. Whether in an apprenticeship or a job, Leyland Trucks proved how important it is that women who want to pursue this career should never be afraid to follow their dreams. Students were guided through the factory and were fascinated by the work of the skilled employees. I saw how rapidly technology was developing and the wonders of robots.

The variety of machines and the way they were built and used was captivating, and sparked many questions in our minds. After our tour, we had the opportunity to go inside the trucks and imagine ourselves in the future when we will rely on these vehicles or may even see them passing by. We learnt to appreciate the hard work that goes into these trucks and the people who build them.

The trucks were vibrant and colourful in their design. I got to sit in the driver's seat and look at my fellow pupils as they asked many questions of the workers there. Overall, it was a memorable experience filled with interest, knowledge and creativity.

-Mishel Rafiq (Year 10)

ENRICHMENT DAY

‘ROAD SAFETY’

MINDFULNESS AND WELL BEING

The second enrichment day for the year took place immediately before the end of the Autumn term, focusing on the theme of road safety. To start the day, our pupils in Years 10 and 11 had an assembly delivered by Lancashire Fire and Rescue as part of the ‘Wasted Lives’ campaign. This provided information and advice about how to keep safe both when travelling as a passenger, and as a pedestrian.

Following the assembly, the initial session of the day focused on road safety incidents and statistics in our local area, and pupils completed tasks to help them to better consider their walking routes. Pupils worked together to complete a driver hazard perception test, highlighting the large amount of information that drivers must act on when driving. After this initial learning phase, pupils in Years 7-10 formed teams and worked together to create a poster campaign, a slogan and an acted advert relating to road safety, each of which was presented to the judging panel. A winning team was selected in each form to act out their advert for all pupils in Years 7-10, plus the judges. Following this, winners were rewarded in each year group for their creativity and the coherence of their road safety campaign. The girls had lots of fun putting their safety campaigns together, and we hope that their learning will help to keep them safe for years to come.

As part of the Autumn enrichment day, the Year 11 pupils took part in enrichment activities after lunch as a reward for their efforts during their mock exams. Pupils were given a choice of taking part in sessions of restorative yoga, crochet, sewing, origami and mindfulness to promote wellbeing. We are sure that the pupils enjoyed the slower pace for the afternoon!

For Safer Internet Day in February, we held an enrichment session in the afternoon for pupils in Years 7-10. The girls completed tasks to learn about the impact that online content can have (both positive and negative), the way that technology has been designed to target and influence users' choices and behaviour, plus the development of strategies to improve people's online experience. This learning is invaluable in equipping our pupils with the skills they need to safely navigate the internet.

SPIRITUALITY

BENEFIT MANKIND CHARITY

Food and winter packs for the homeless.

This term, the school collaborated with a local charity, Benefit Mankind, to assemble food and winter packs for the homeless. Our students fundraised through innovative means, such as bake sales. They walked the streets of Blackburn, personally delivering the winter and food packages to those in need. Later, the girls visited the Salvation Army and generously handed over the remaining supplies to the residents. During their visit, they encountered inspiring stories from some of the residents. One student described the entire trip as an "inspiringly moving and gratitude-inducing experience." Before the trip, the girls also entered a competition where they were tasked to write a letter to the homeless. Mishel Rafiq, a student from year 10, read her letter to the homeless and the residents were very moved by this.

BENEFIT MANKIND
Registered Charity No. 1187849

IFTAAR PACKS

RAMADHAN CHARITY

One of the core themes of the PRSHE curriculum is 'living in the wider world'. This is where students have opportunities to learn about rights and responsibilities, and to appreciate what it means to be a valuable member of an ever-changing and diverse society. Our aim is to develop students' sense of self-worth by playing a positive role in contributing to school life, and to have empathy for others in their local community who may be in need of our support.

We launched our Ramadhan Iftar pack project to show our support and care towards widows and children in our community. We are delighted to announce that we raised £820 in just 2 weeks! With the money raised we were able to give out Iftar packs to 50 families to show them that they are in our thoughts and prayers. The Yr 10 Food Preparation and Nutrition students helped to bake, pack and distribute the packs to the families; the genuine appreciation and Duas for our school and students received from the recipients and their families was overwhelming. It was an experience the students will forever remember.

YEAR 8 SLEEPOVER SCOUTS

When we first arrived at the masjid, we all got settled in and the girls sleeping outside put up their tents. After a while, we made our way over to the masjid to pray Isha Salah behind the Imam and then cleaned up the ladies side of the masjid. We ate a snack before getting ready for bed, though none of us slept.

In the morning, we ate breakfast, consisting of toast, chocolate waffles and cereal. We then proceeded to hike from Madrasah Salaam to central Fulwood, where the scouts' headquarters was located. We took part in enjoyable activities, including archery, sip-n-paint, making lunch and making smores. After that we ate lunch, which was chicken wraps made on the blazing fire. We all ate outside and enjoyed the beautiful scenery. We then cleared up and got ready for our vigorous hike back to school. By the end of it, our limbs were aching, and all we wanted to do was to go home and sleep, though it was a delightful experience.

- **Sumaya Ikram**

BLING UP YOUR TASBEEH SCOUTS

The Year 7 Girl Scouts undertook a very special activity where they took digital tasbeehs and blinged them up.

They beautified the remembrance of Allah SWT through some unique and creative digital tasbeehs. The girls busied themselves, all the while considering the significance of their task - which was to use the tasbeehs to pray with. To the one whose jewellery they used as a form of sadqah e jaariyah. The beauty of Allah's generosity is that the rewards can continue to accumulate even after leaving this temporary abode.
